PROFESSIONAL SUMMARY

Software Engineering undergraduate and Full-Stack Developer with hands-on experience developing web and desktop applications using Java, Spring Boot, React, JavaScript, TypeScript, PHP, Laravel, and MySQL. Experienced in building REST APIs, database-driven applications, responsive user interfaces, booking systems, and automated business solutions. Developed real-world applications including a transportation booking and pricing platform and a Java-based inventory management system. Strong foundation in object-oriented programming, MVC architecture, REST API development, SQL, and software engineering principles, with a strong interest in learning modern enterprise application development and contributing to collaborative engineering teams.

EXPERIENCE

- Full-Stack Developer — Molla Taxi and Tours**2025 – Present
- Designed and maintained a responsive company website using PHP, Laravel, JavaScript, TypeScript, HTML, CSS, and Tailwind CSS, following clean coding practices to support a live production site.
 - Built and optimized backend systems for bookings and package management, writing efficient SQL queries to improve data retrieval performance.
 - Engineered an automated distance-based pricing calculation feature using Laravel and PHP, integrated directly into the booking workflow.
 - Collaborated with UI/UX designers and cross-functional team members to improve usability, responsiveness, and overall user experience of the platform.

PROJECTS

- Automated Pricing & Booking System — Sri Lanka e-Travels & Tours**
- Designed and implemented a distance-based automated price calculation system using Laravel, PHP, JavaScript, and TypeScript.
 - Integrated booking and package management features with optimized SQL queries and a responsive UI for real-world business use.
- Molla Taxi & Tours — Full-Stack Transportation & Tour Platform**
- Built an automated distance-based fare calculation system using Laravel, PHP, JavaScript, and MySQL..
 - Developed dynamic vehicle pricing and route-based fare calculation logic.
- Noir AI — Conversational Assistant Platform**
- Developed an AI chatbot system using Laravel, PHP, JavaScript, and TypeScript to handle real-time conversations and user assistance.
 - Implemented chat management and context-aware response handling, with backend logic optimized for scalability.
- Smart Inventory Management System**
- Developed a Java and MySQL desktop application with CRUD operations, low-stock alerts, and database-driven inventory tracking.
 - Implemented a FlatLaf-based user interface, applying object-oriented design principles to improve usability and visual consistency.

TECHNICAL SKILLS

Languages: Java, PHP, JavaScript, TypeScript, HTML5, CSS3, SQL
Frameworks & Libraries: Spring Boot, Laravel, React, Next.js, Tailwind CSS, Bootstrap
Databases: MySQL
Tools & Platforms: Git, GitHub, Postman, Vercel, VS Code, Apache NetBeans, IntelliJ IDEA
APIs & Architecture: REST APIs, MVC Architecture, CRUD Operations, API Development, Database Design
Development Concepts: Object-Oriented Programming, Responsive Web Development, Full-Stack Development, Software Engineering Principles, Clean Code, Client-Server Architecture

EDUCATION

- BSc (Hons) in Software Engineering — Birmingham City University**2024 – 2028
- AWS re/Start Program (Cloud Computing) — Cultus Education**June 2026 – August 2026

LANGUAGES

English - Expert
